

AddGX-1212®

Product Data Sheet

“Ashless Non-Metallic Gasoline Fuel Combustion Enhancer Additive”

DESCRIPTION

AddGX-1212® hydrocarbon based combustion enhancer fuel additive for gasoline fuel. The combustion enhancer actually works within the kinetics of the combustion reaction to intrinsically reduce the amount of emission and in doing so reduce the amount of fuel consumed. It is not merely a detergent that achieves better combustion by improving fuel spray pattern. The combustion enhancer works both in new engines and older engines to improve emissions and fuel efficiency.

APPLICATION

GASOLINE FUELLED ENGINES

Dose **AddGX-1212®** to gasoline fuel storage tank and assure adequate mixing of additive or in-line blending or by mechanical rotor at ambient temperature and pressure.

SAFETY AND HANDLING

AddGX-1212® is stable in mild steel and aluminum storage tanks or in original containers over long periods of time.

AddGX-1212® is an industrial chemical and should be handled with the same precautions as used with ordinary distillates, solvents, and weak alkalis. Avoid open flame. Avoid skin and eye contact. Wash contaminated areas with soap and water.

TYPICAL PROPERTIES

Appearance	Colourless
Density at 15 °C, ASTM D4052	0.69 – 0.71 kg/l
Viscosity at 40 °C ASTM D445	0.68 – 0.70 cSt
Flash Point, ASTM D56	< -25 °C
Compatibility with Fuel	Miscible
Water	Nil Wt%

AVAILABILITY

AddGX® is supplied in bulk and net 200 litre non-returnable drums.

Shipping classification:

HS No. 3811.9000

UN No. 1992

“Gasoline Fuel Additive”

Before handling, storage or use, see the Material Safety Data Sheet (MSDS) for details.
